

The image consists of two side-by-side panels, each showing a close-up of fossilized tree leaves. The leaves are dark grey or black, with intricate, branching vein patterns clearly visible. The veins radiate from a central midrib, creating a complex, web-like structure. The fossilization process has preserved the fine details of the leaf's internal structure. A green rectangular box is superimposed over the center of both panels, containing white text.

TU AS SÛREMENT RECONNU QUE CE SONT DES  
EMPREINTES DE FEUILLES D'ARBRES !
